

In the Specification

[0013] **Figure 3** shows another setting in which a set of aligned optical parts (only one being shown) are being bonded to a flat substrate; and

[0014] **Figure 4** shows an exemplary setting in which two parallel optical parts are being bonded to a substrate with 4 wedges; and

Figure 5. illustrates a configuration in which the present invention may be practiced, the device including two collimators and a device, wherein the device is collectively to represent one or more optical parts/devices and functions between the two collimators.
